

A large industrial facility, possibly a refinery or chemical plant, is shown at night. The scene is illuminated by numerous bright lights, creating a complex and detailed view of the various structures, pipes, and towers. The overall atmosphere is one of intense industrial activity.

Give your valves the  
star treatment

# Quality – Knowledge – Precision – Perfection

**Quality** has always been the main focus for LarsLap. Since we started over 25 years ago we have produced and delivered quality to companies all over the world. This has given us a good reputation and a goal to always keep that in whatever we do.

To reach good quality we believe that customer care is a major part and should always be in focus. Sharing our extensive **knowledge** and giving our customers an advanced position towards their competition is something that we take seriously.

Starting in Mr. Larsson's garage 1984 with valve grinding machines, LarsLap has reached to be a world company in valve maintenance.

Still focused on quality and knowledge we now use our past experiences combined with the vast knowledge and experience of our new partners.

The factory in Le Teil, France have been providing the nuclear industry, the government and the major industries in France with top quality and top precision test benches for over fifteen years.

Our new partners have been living by the same base values as LarsLap has, with quality, customer care and knowledge sharing.

Our mutual business ethics and love to what we do gives us a sound foundation to give you what you want.

We can promise you the **precision** and **perfection** that LarsLap have been giving to our customers and will keep on doing for many years on.

So, we want to welcome you to the LarsLap family where we see you as the most important customer as long as the lifetime of your equipment and on.

Contact us and let us provide you with what you need, when you need it and with the perfection and quality you demand.

**Welcome to the LarsLap family**

# Quality – Knowledge – Precision – Perfection

## Quality

All test benches are built with selected high grade materials. The high quality demands of the nuclear industry are put into every detail to give a long and trouble free lifetime. As an example, we only use stainless steel in all valves and pipings.

## Knowledge

The extensive knowledge of valve maintenance and valve testing is brought on to our customers and into our machines and benches. For us it's important that you as a user have a full understanding of what you are about to do. Our goal is reached when you get the result you want.

## Precision

We build in precision in every detail to give you the best result every time. Your result is as important for us as it is for you.

## Perfection

With precision comes perfection. Our goal is to give exactly what you want, with the perfection you demand. Our modern systems will give you an efficiency and perfection in what you do every time you do it.

## Success in the world market

Following up its achievements in the field of valve reconditioning and servicing in the Swedish nuclear and process industries, LarsLap has successfully exported its machines to numerous countries, both direct and thru carefully selected partners. Satisfied customers from different parts of the world have commented favorably on the quality, performance and cost benefits of LarsLap valve grinders. In their words, *"LarsLap supply the best and most comprehensive range of portable valve grinders on the market"*.

The proof of this is that the customers keep coming back to order more machines and accessories.

In response to numerous requests from customers the world over, LarsLap has contributed to special application development to fit different special needs.

Also due to request we now will serve you in the test bench market and provide the same standard of quality and service as you expect from LarsLap

So, let us welcome you to the quality and care of LarsLap
